

# MULTIRACK™ Optic/Thermistor Rack Control

---

## FEATURES:

- Allows the **SEELLEVEL™** truck gauge to control an optic or thermistor style loading rack
- Provides unparalleled loading flexibility for a range of products such as crude oil, condensate, or chemicals without any changes to the system
- The system allows the **MULTIRACK™** to be used in conjunction with a **SPILLSTOP™** to provide overfill protection for both PTO pump loading and rack controlled loading
- Proven **SEELLEVEL™** reliability eliminates probe problems in unrefined products
- Diagnostic LEDs provide visual indication of rack plug condition and permit status
- The **MULTIRACK™** circuitry runs entirely on rack power - no truck power is required
- Fibre optic connection between gauge and **MULTIRACK™** provides total electrical safety
- Operation from -40 °C to +60 °C (-40 °F to +140 °F) ambient temperature
- Easy installation and servicing, uses standard rack plugs
- One year limited warranty
